

Casos de uso

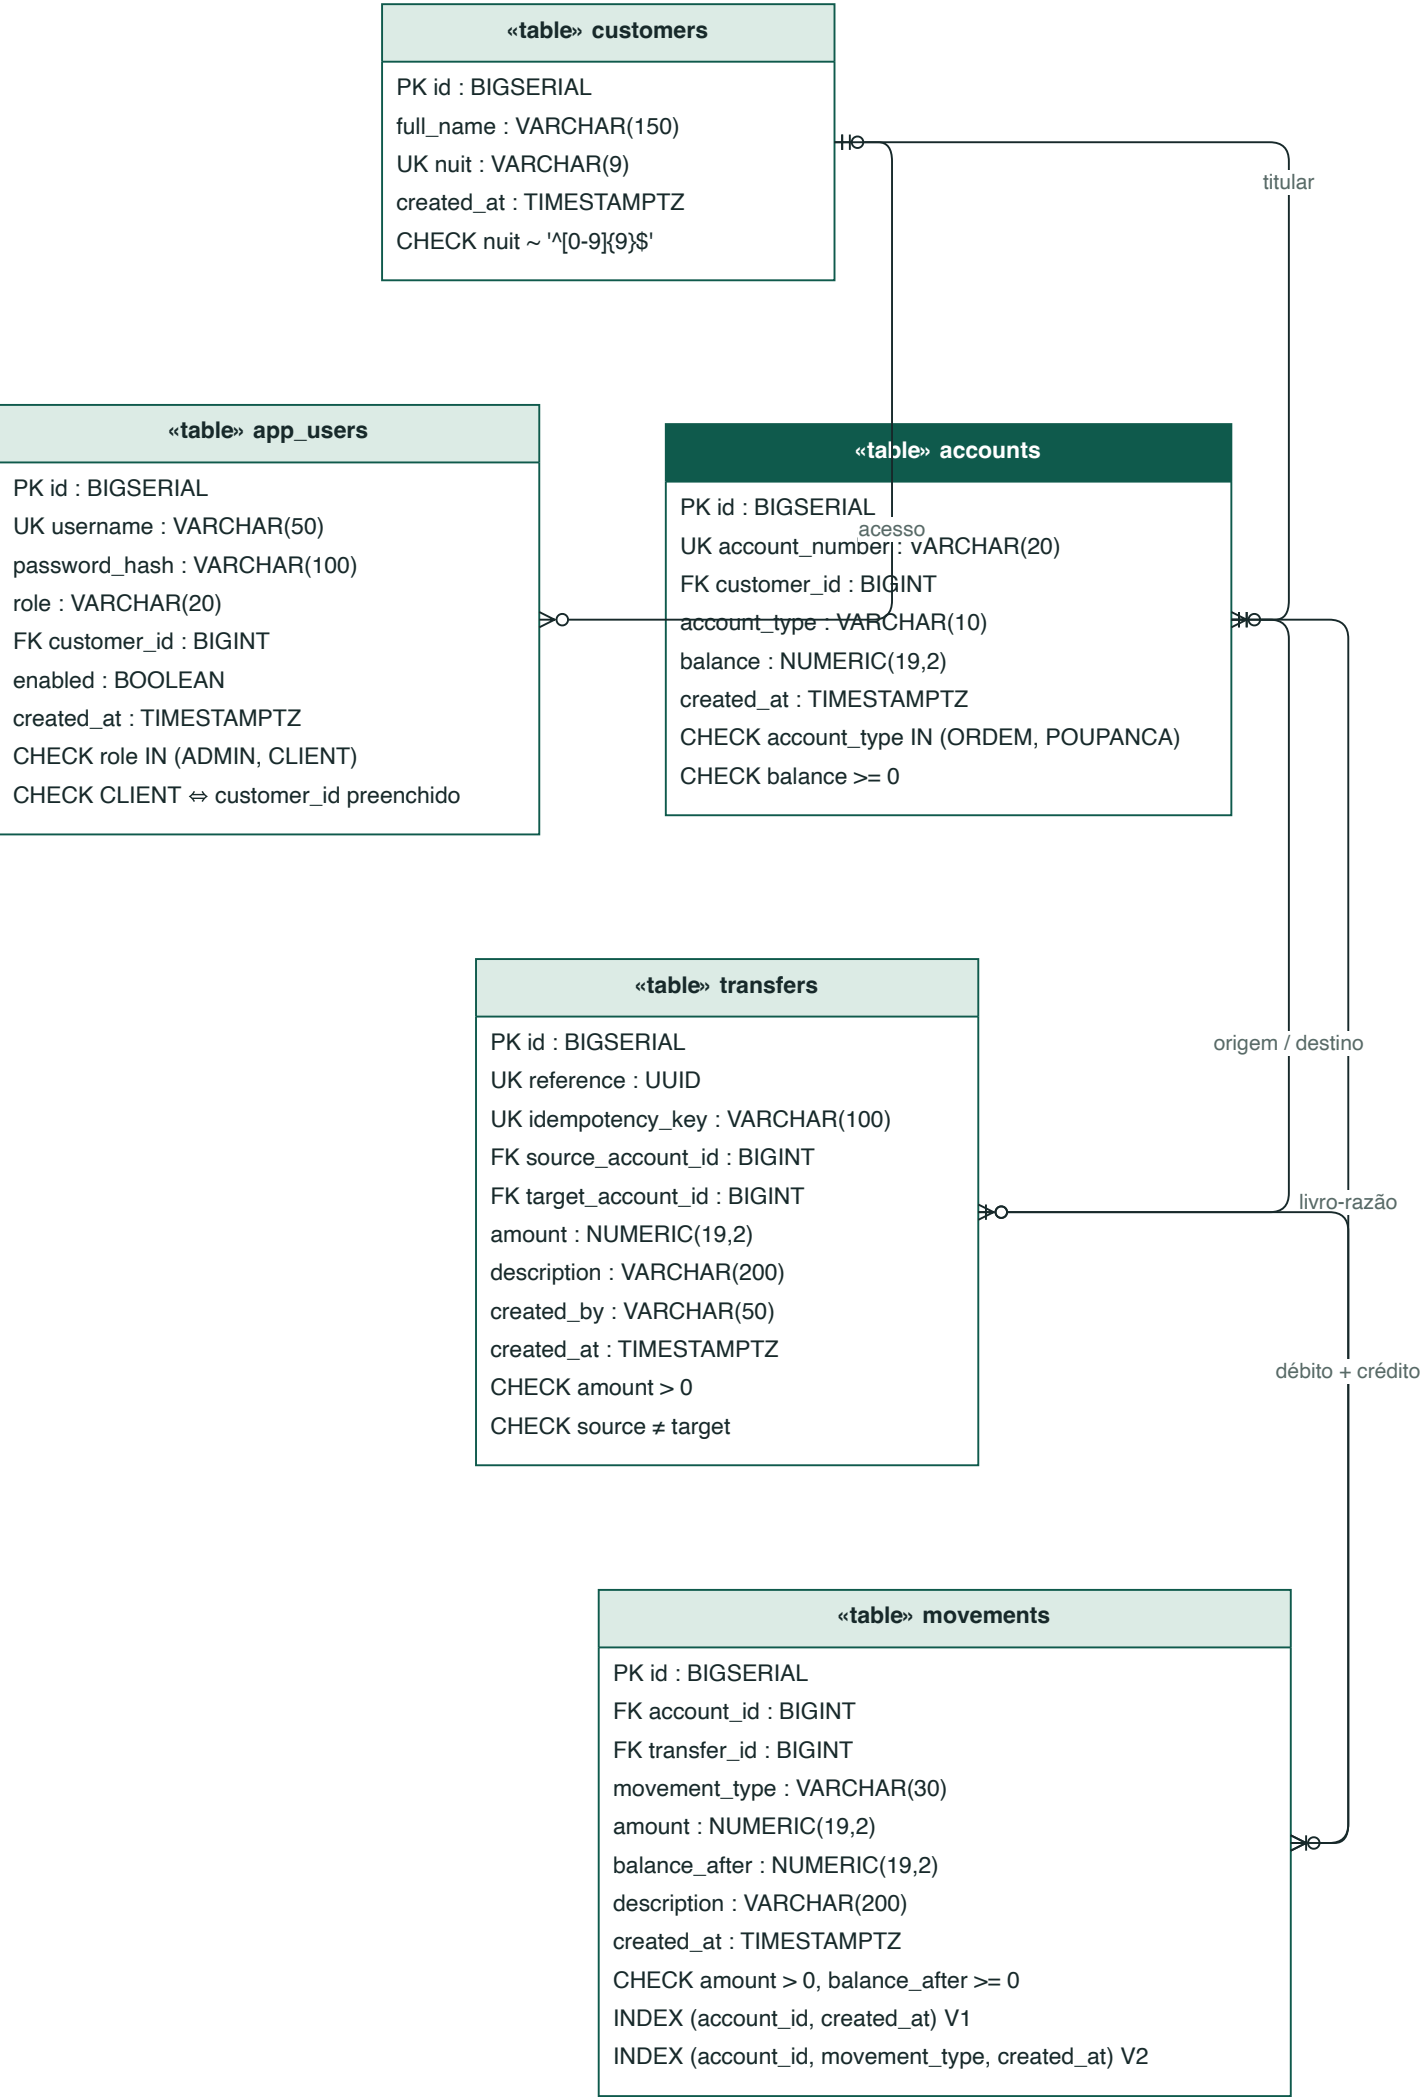

Arquitectura de componentes

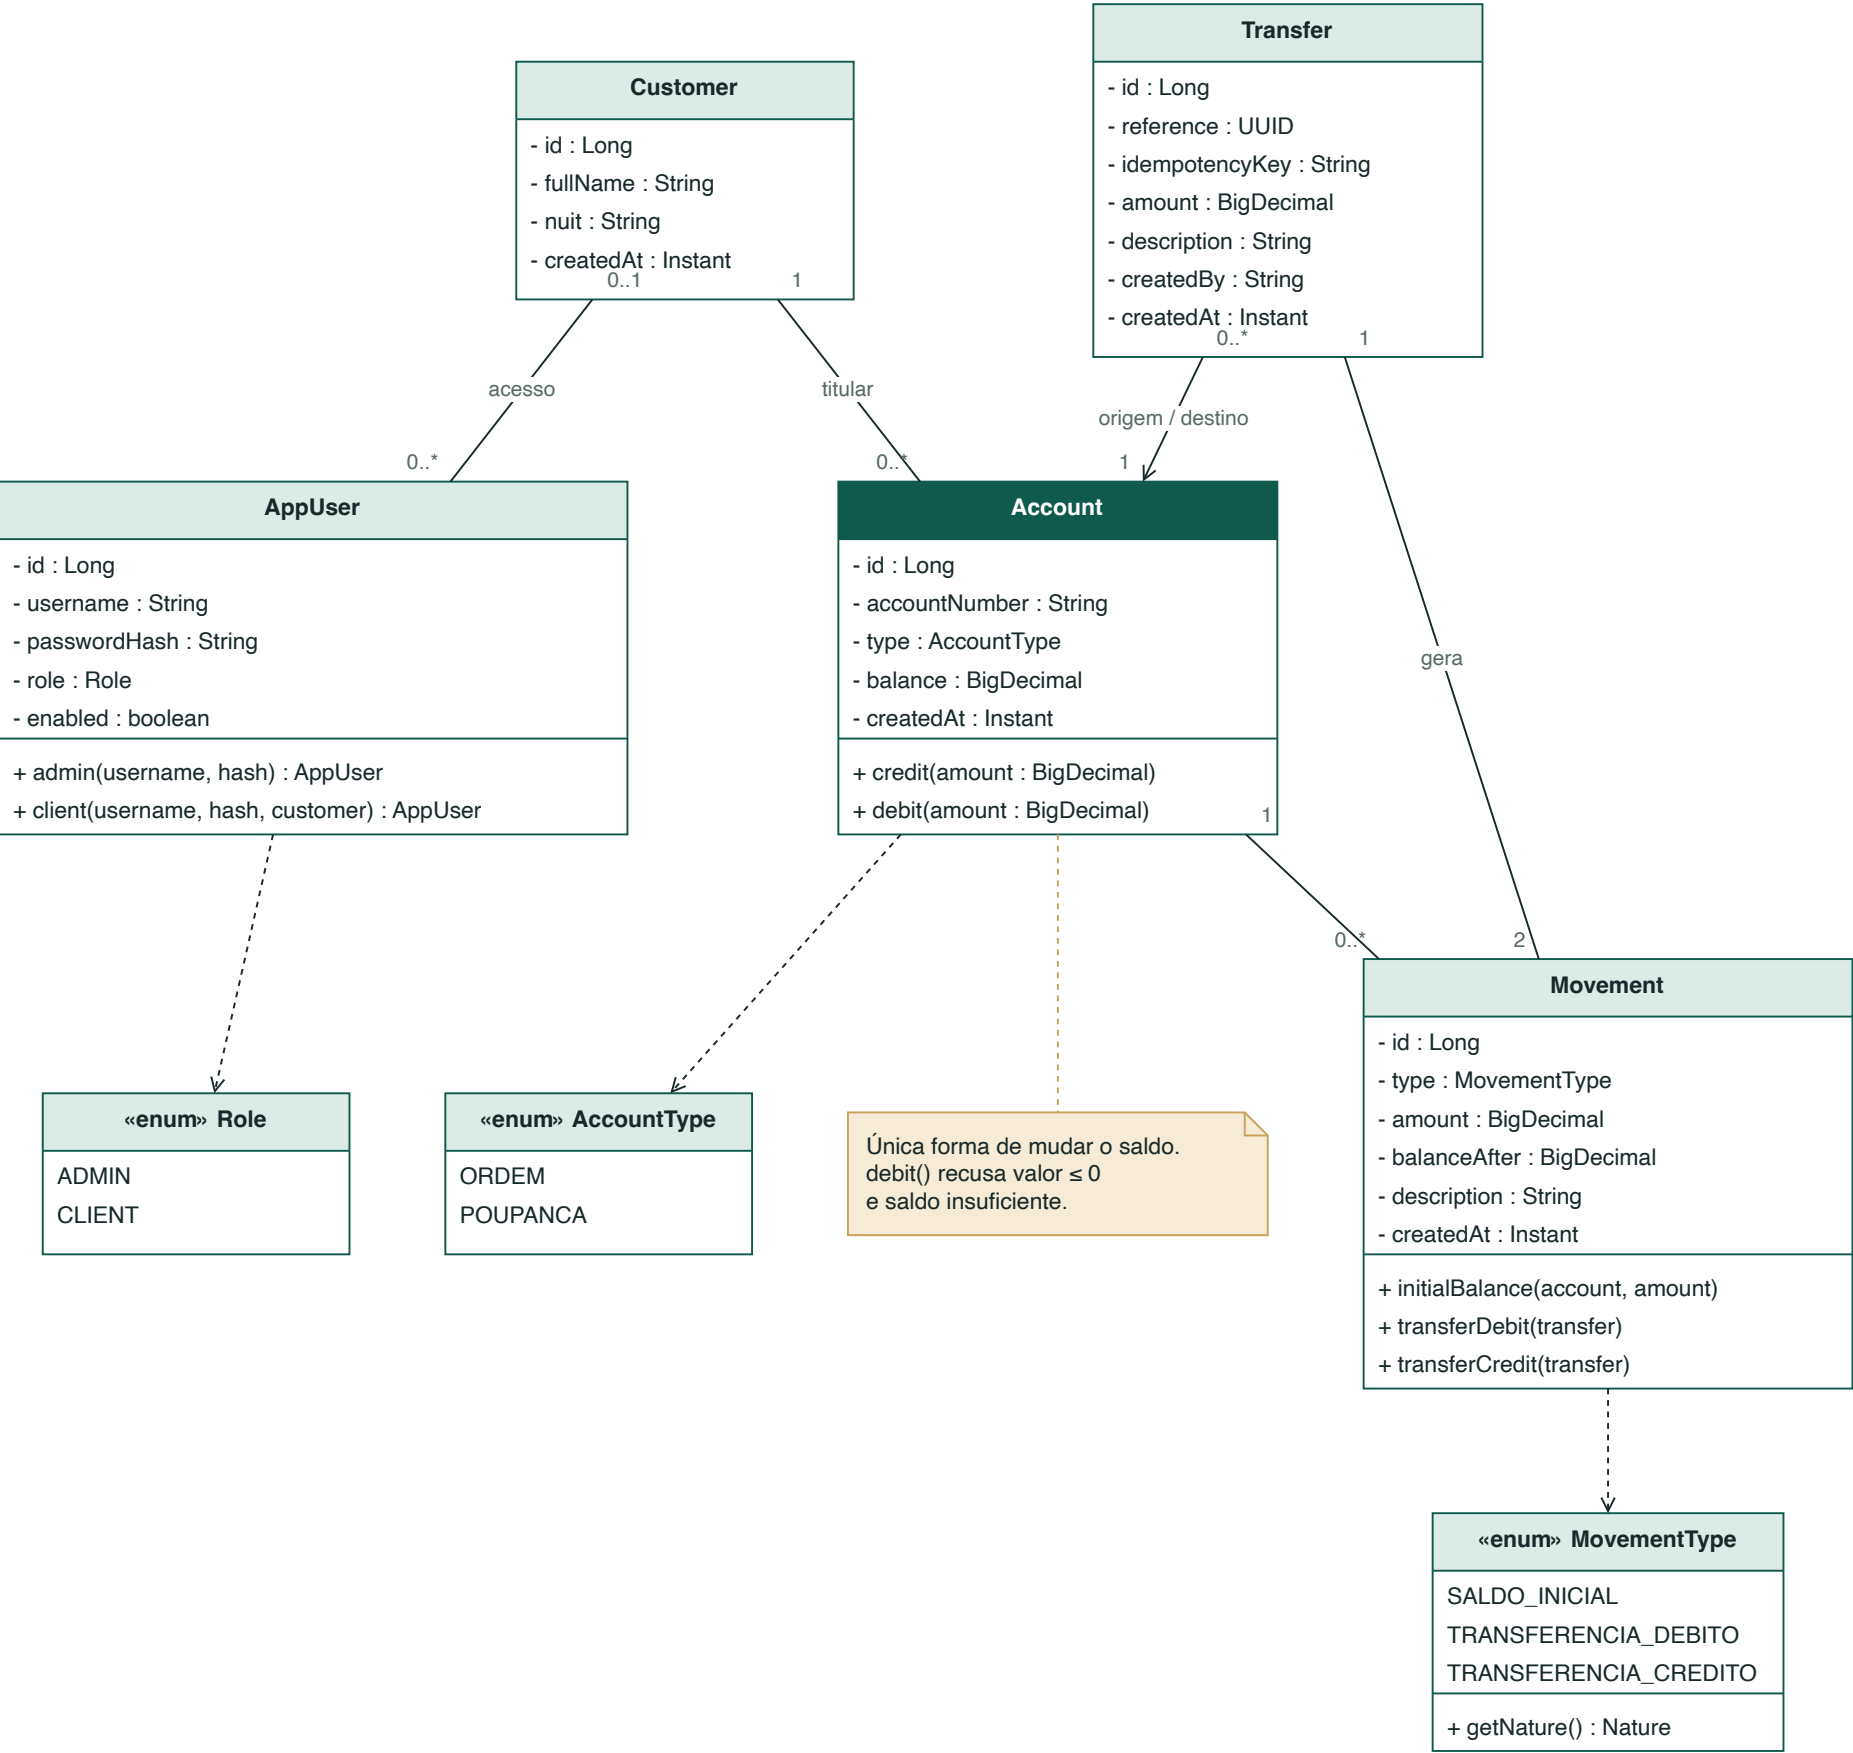

Implantação com Docker Compose

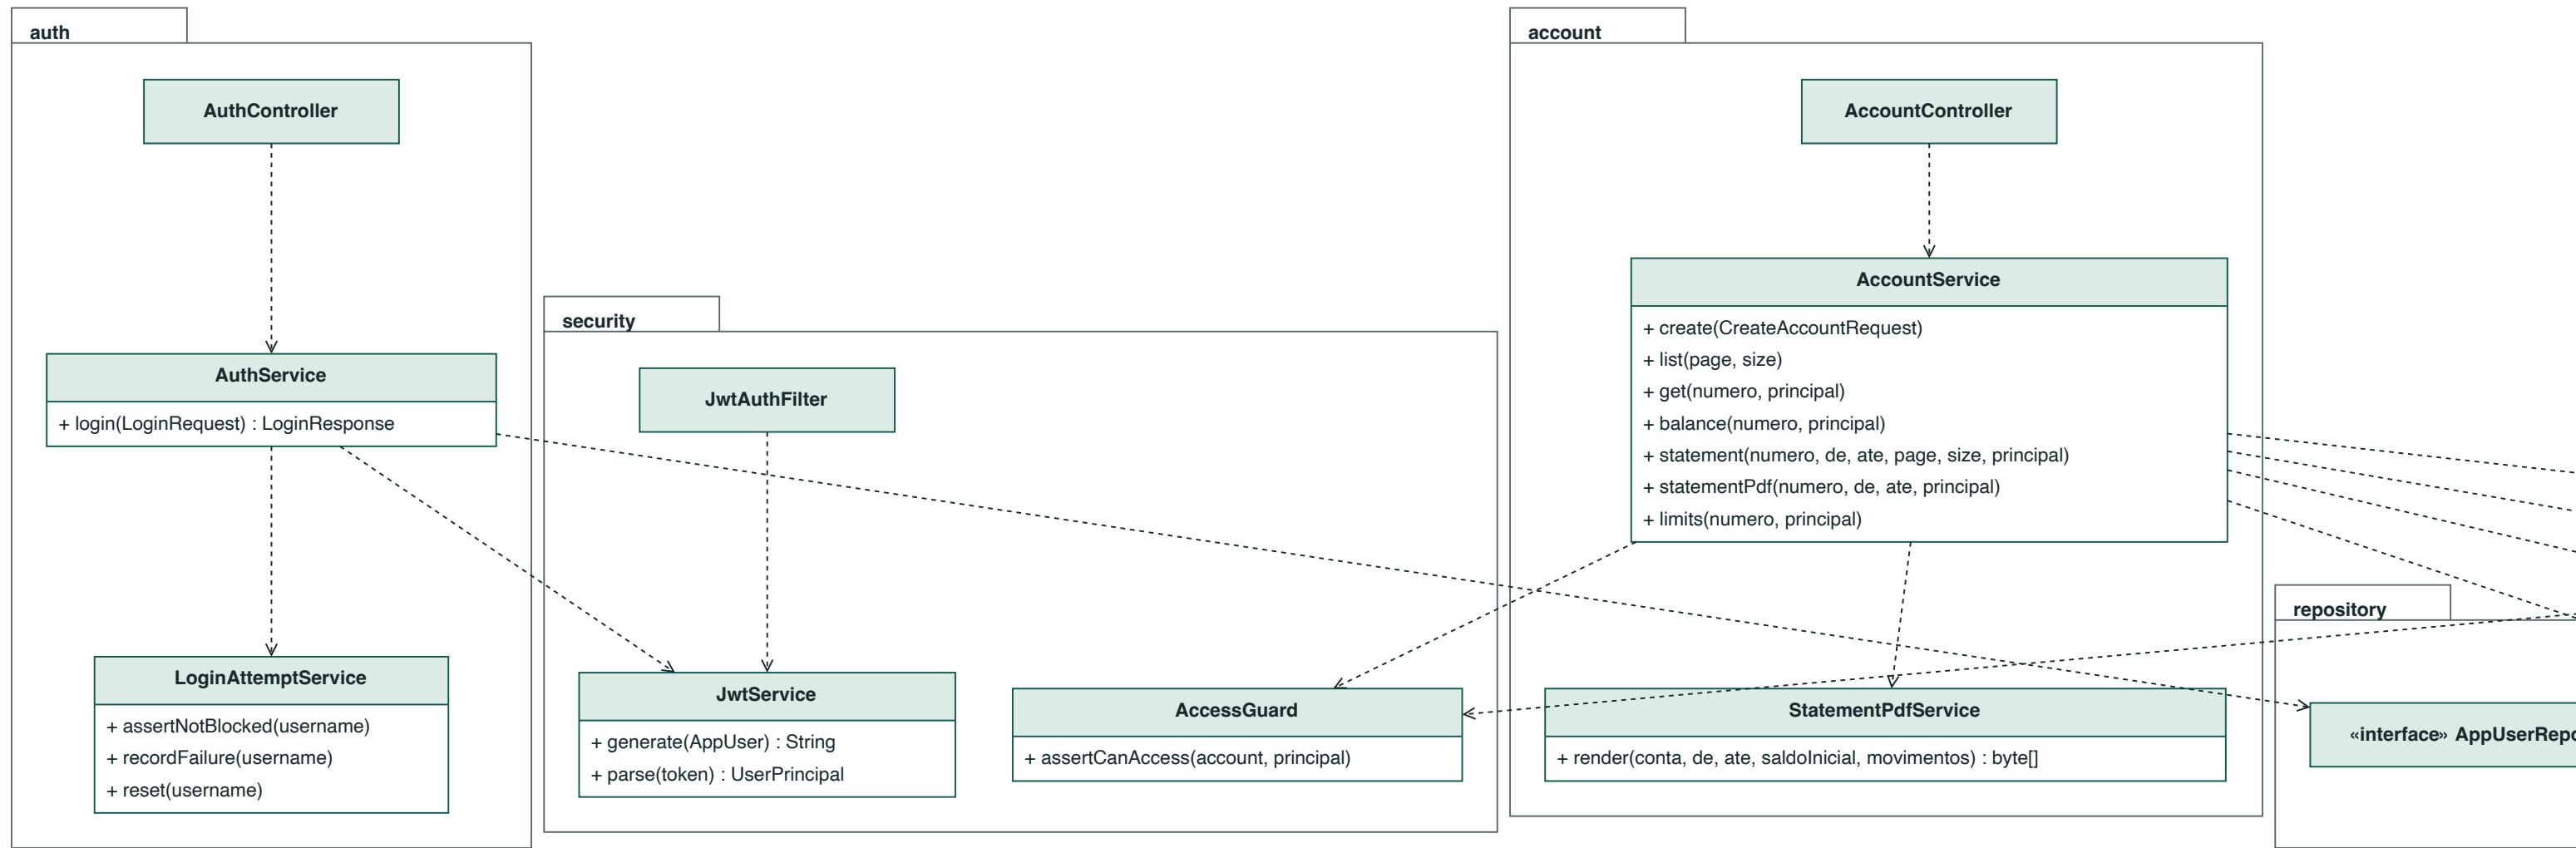

Modelo de dados (PostgreSQL)

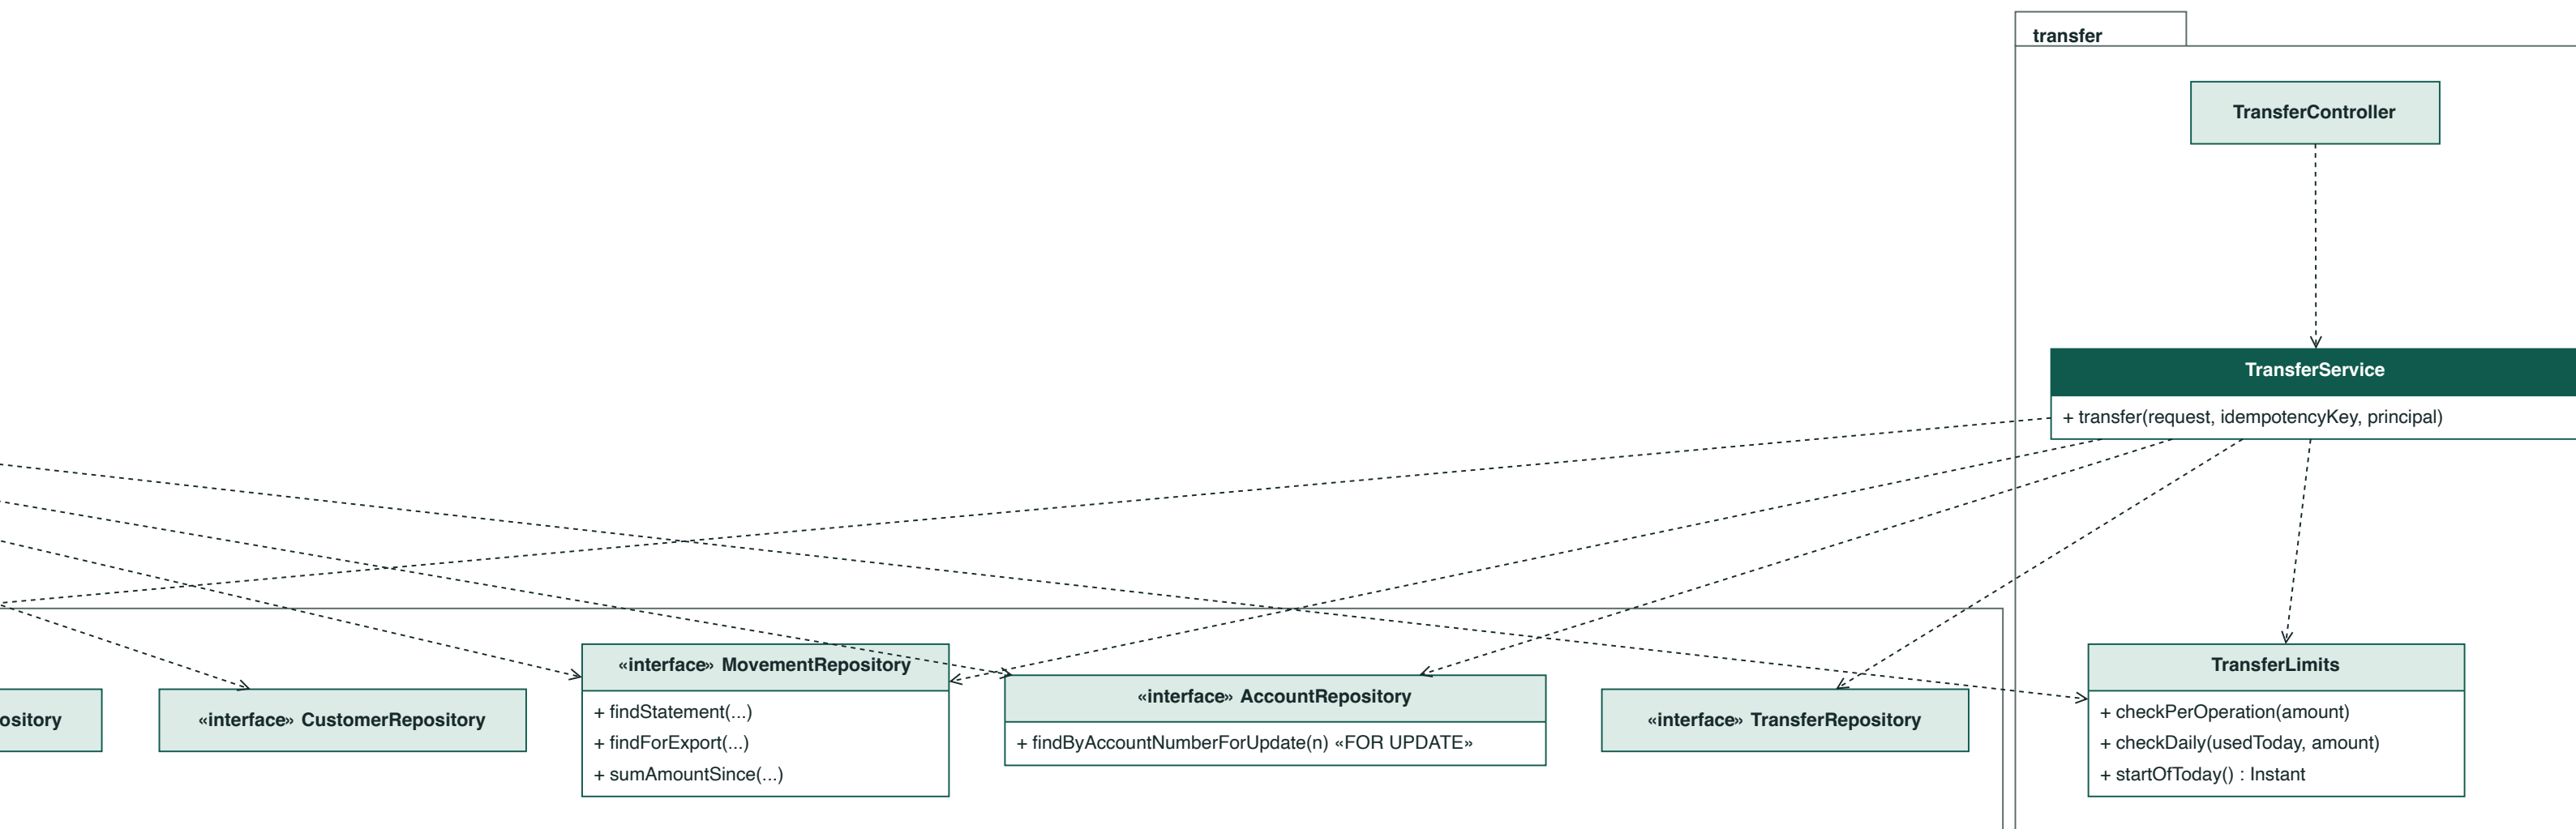

Modelo de domínio (entidades JPA)

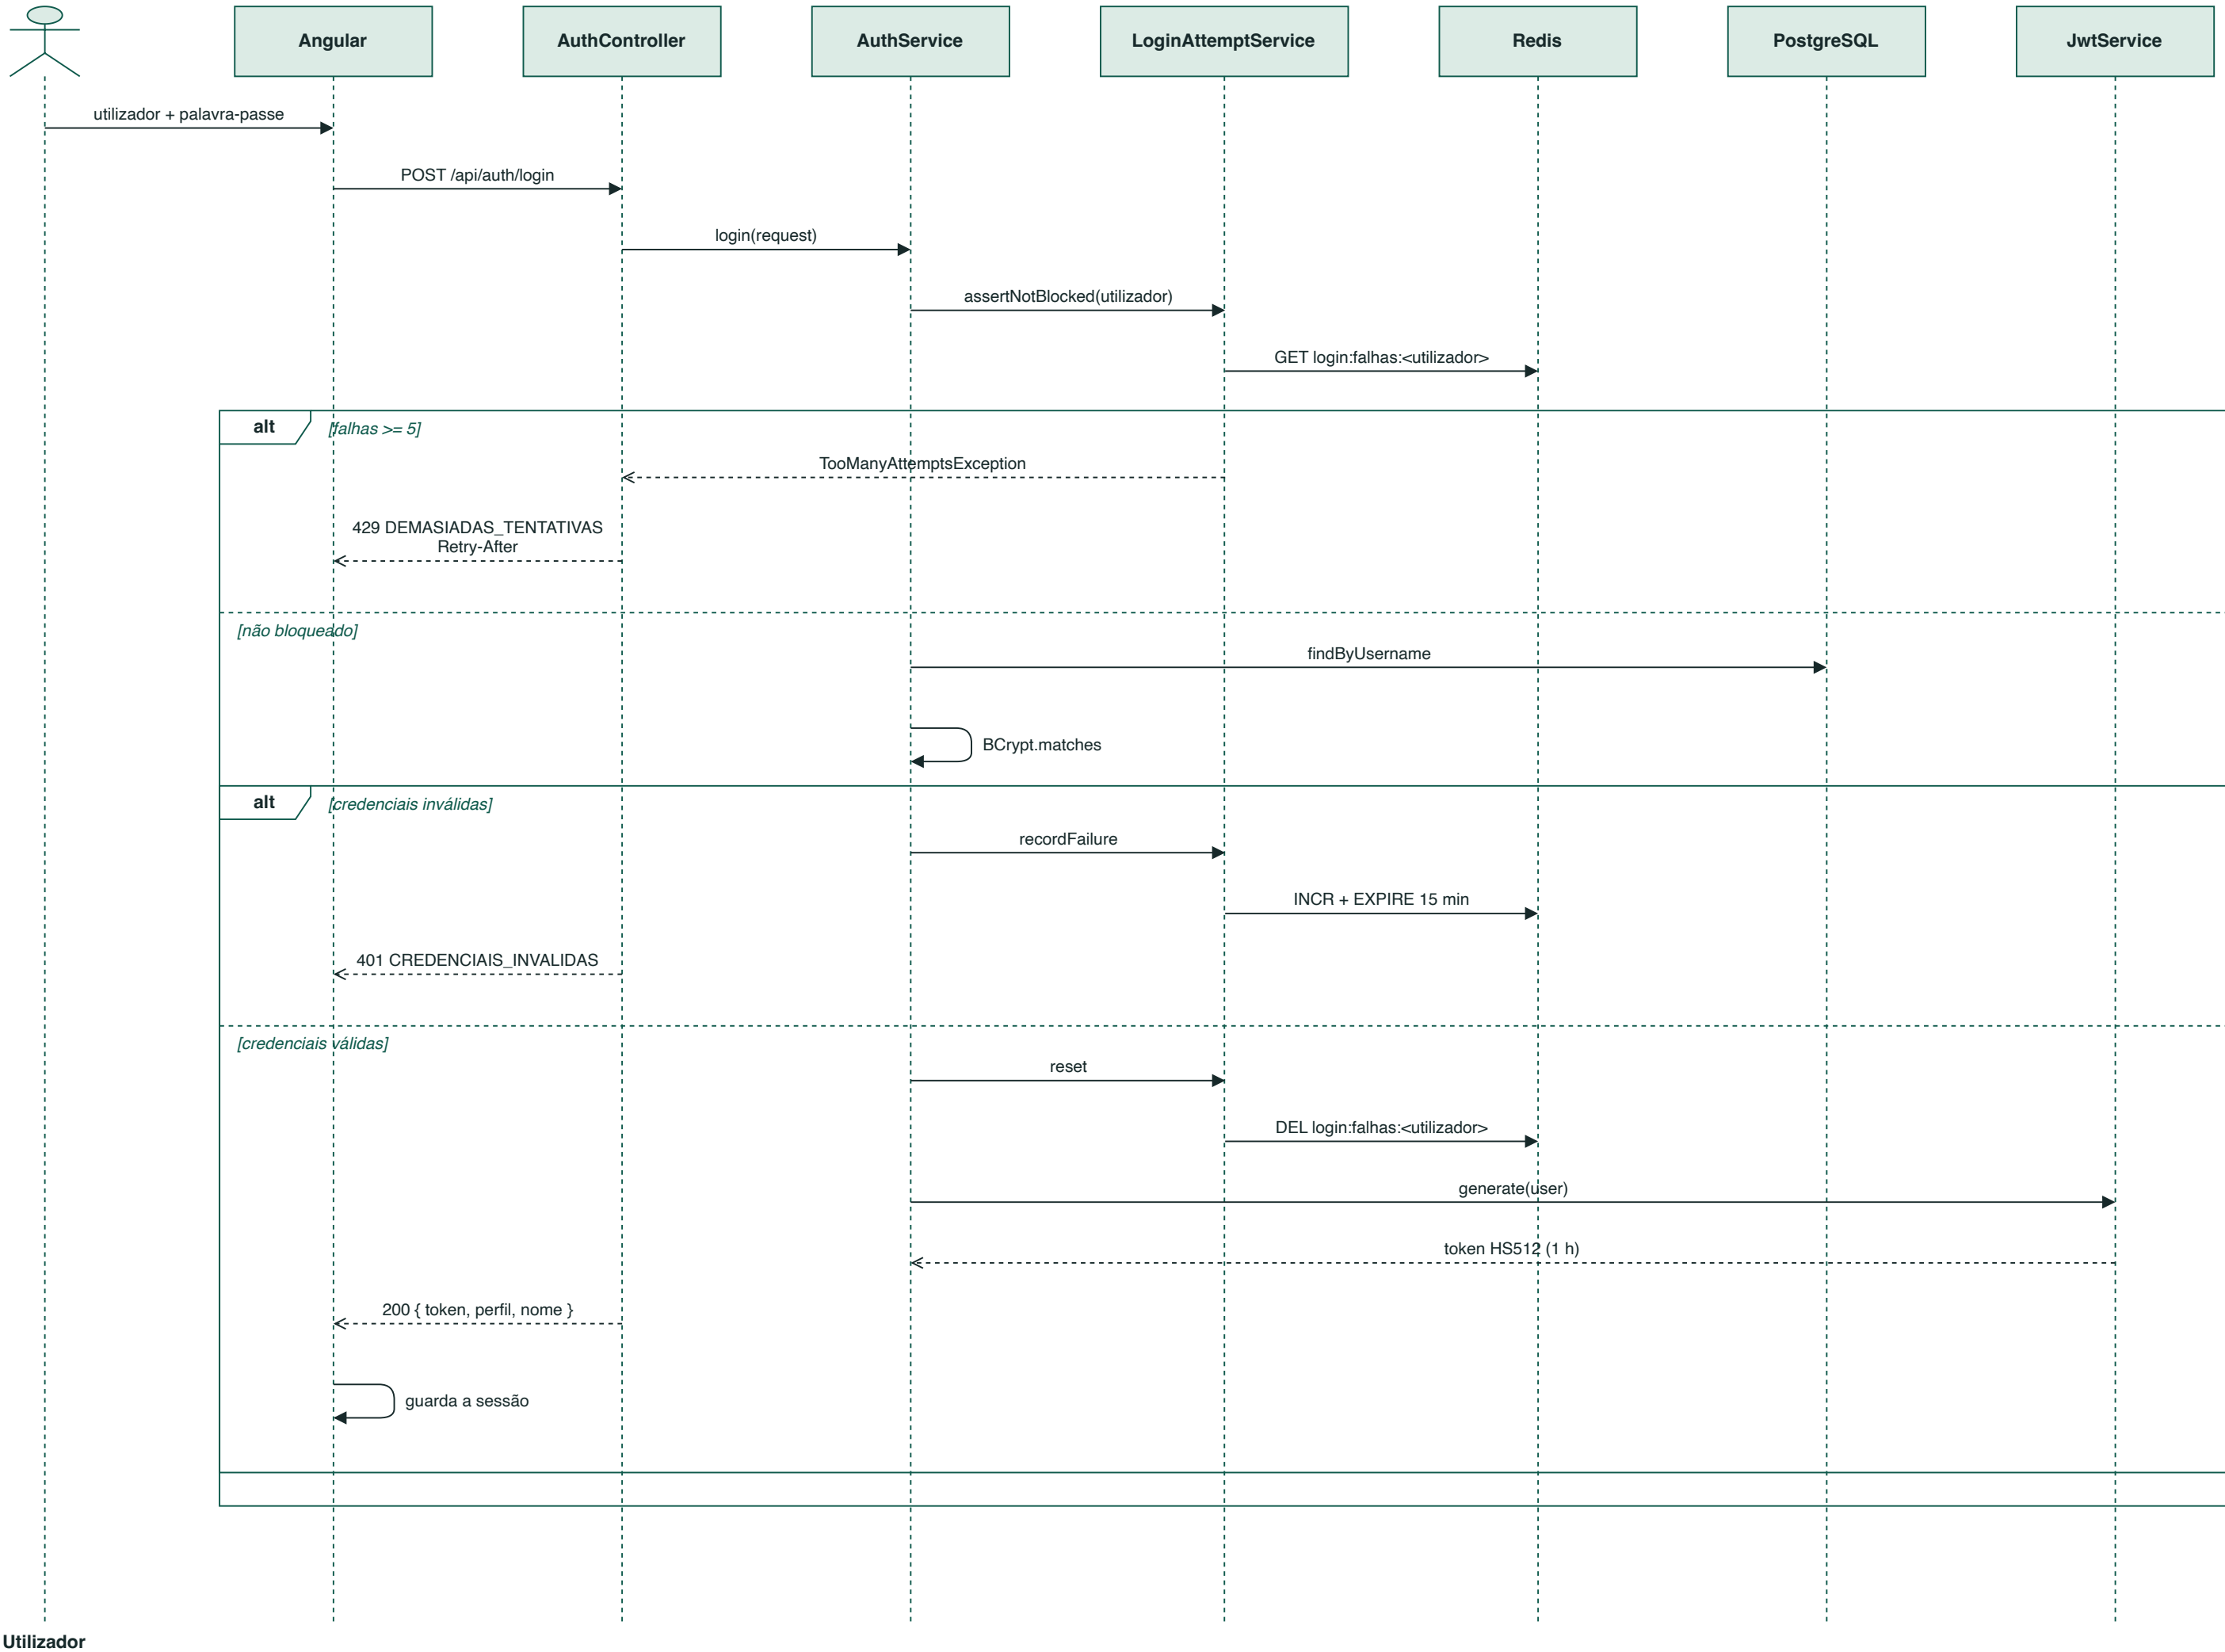

Backend: controllers, serviços e repositórios

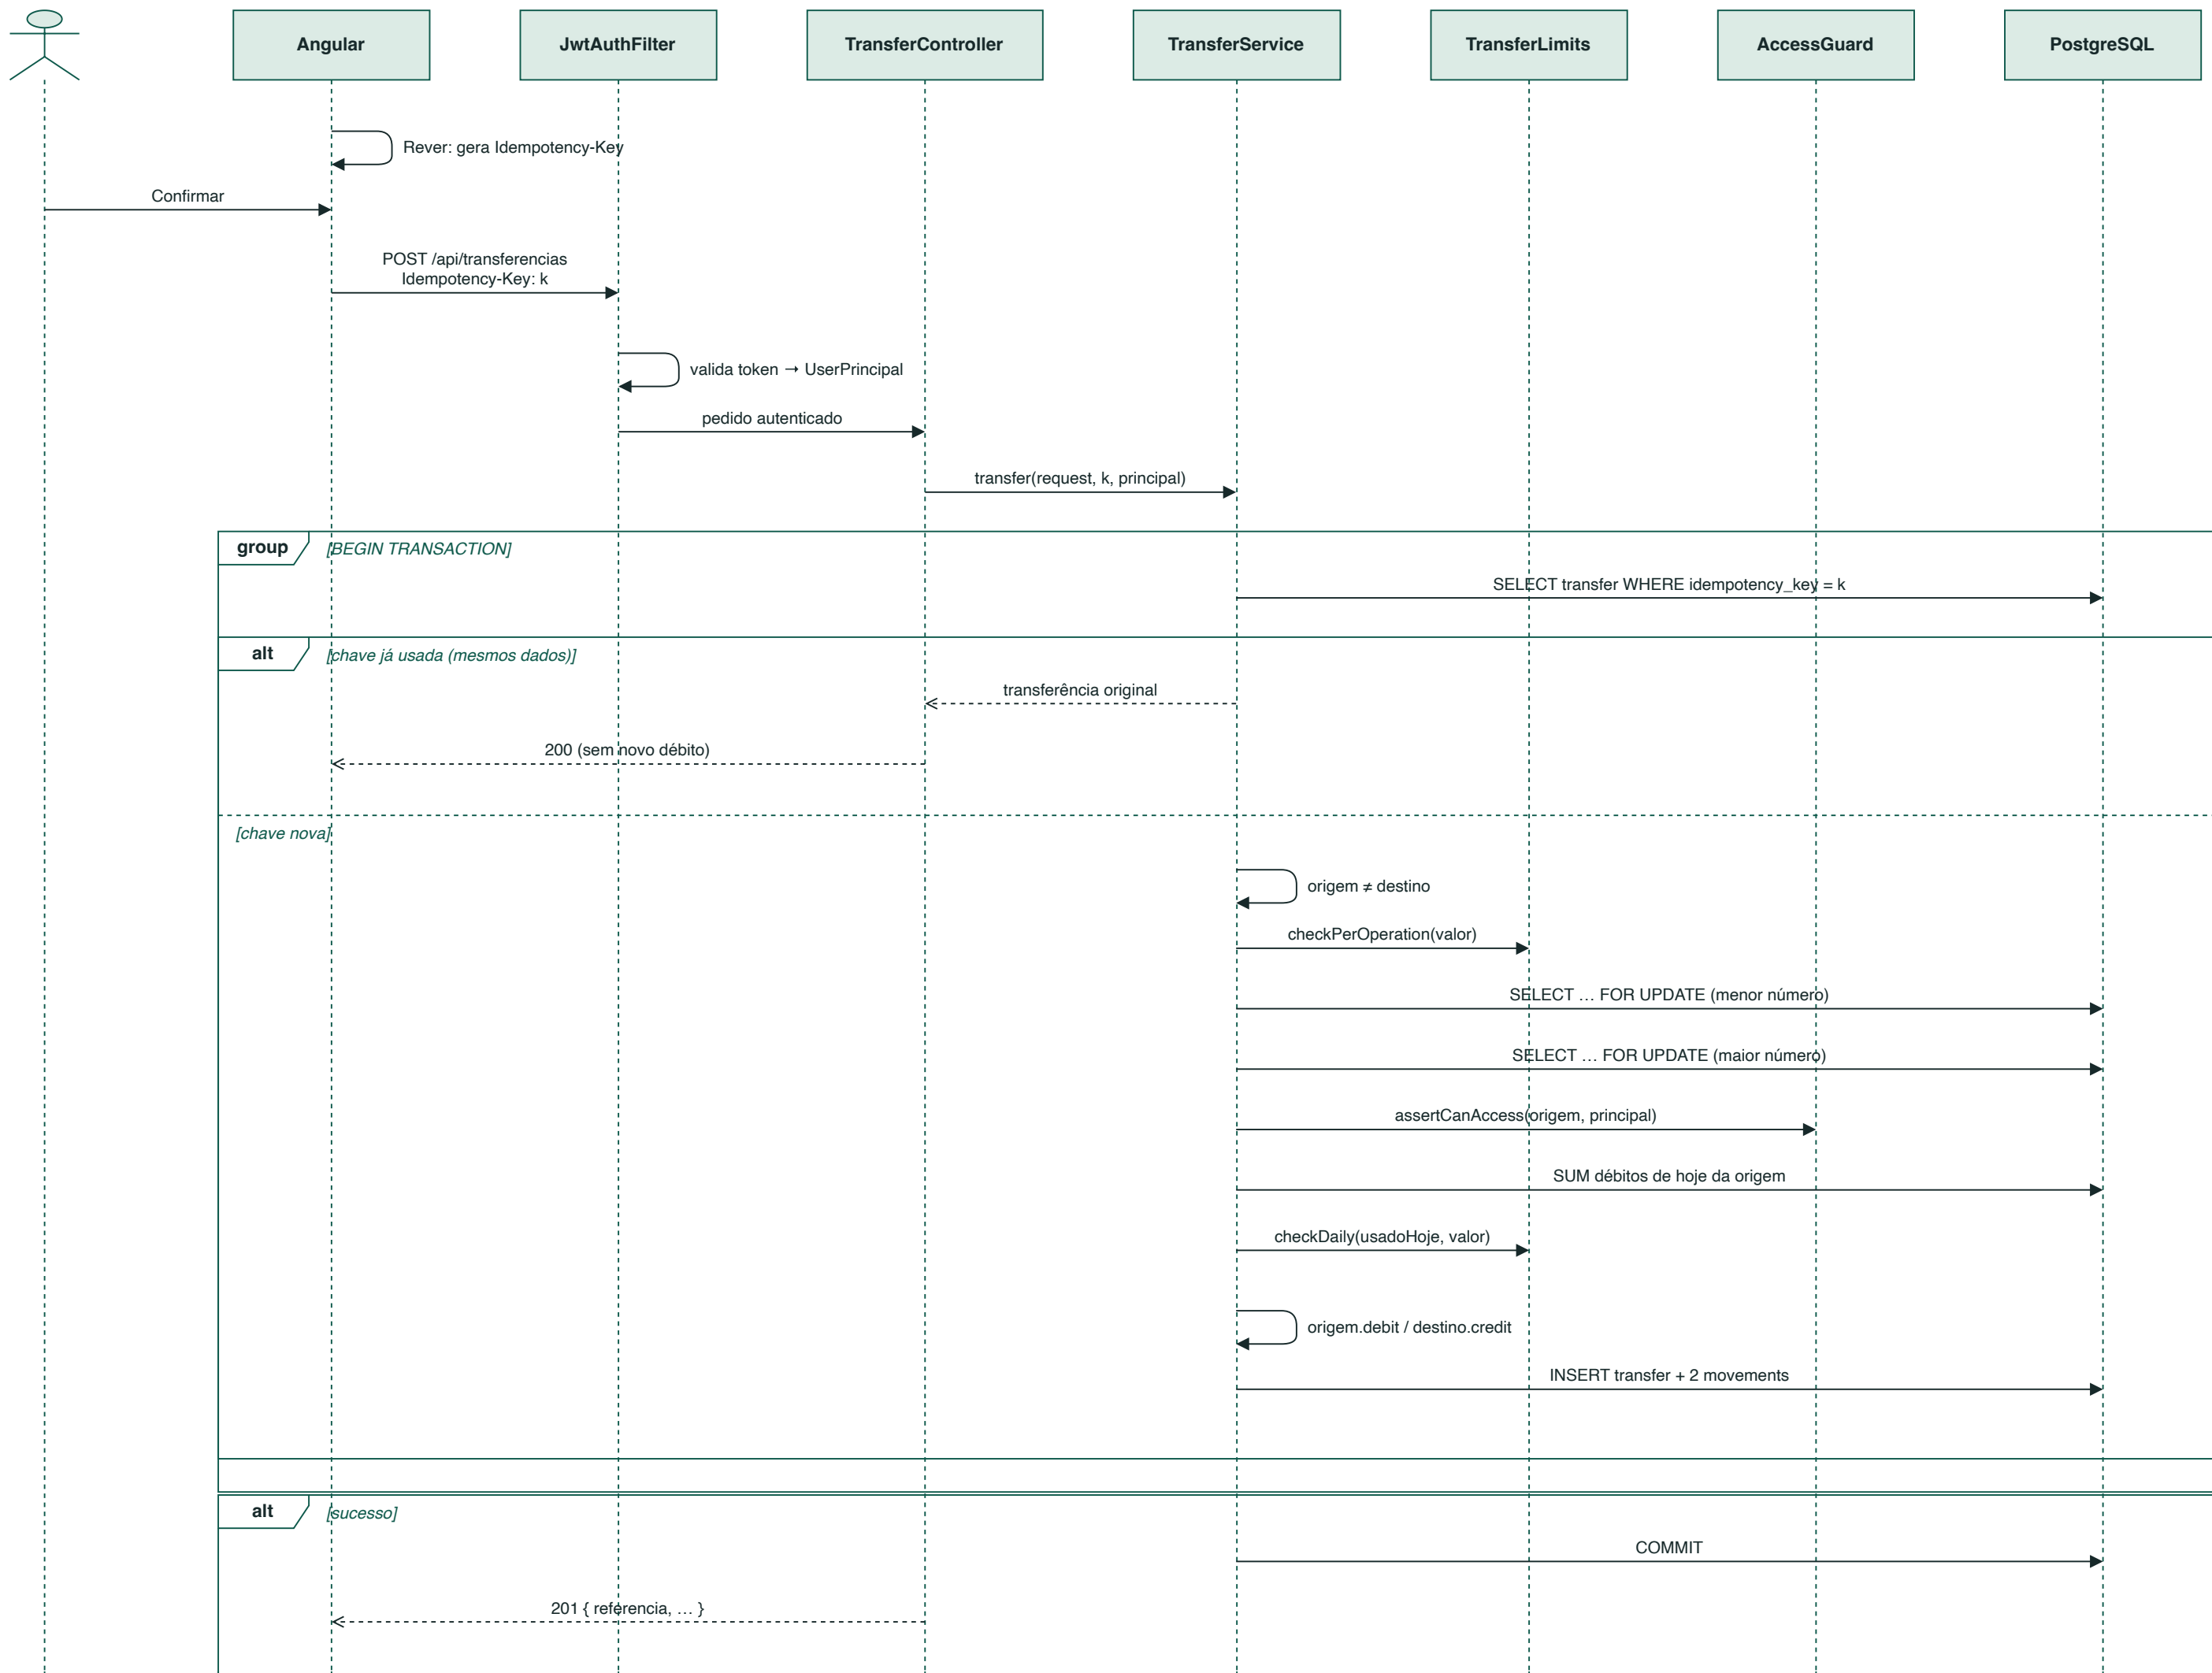

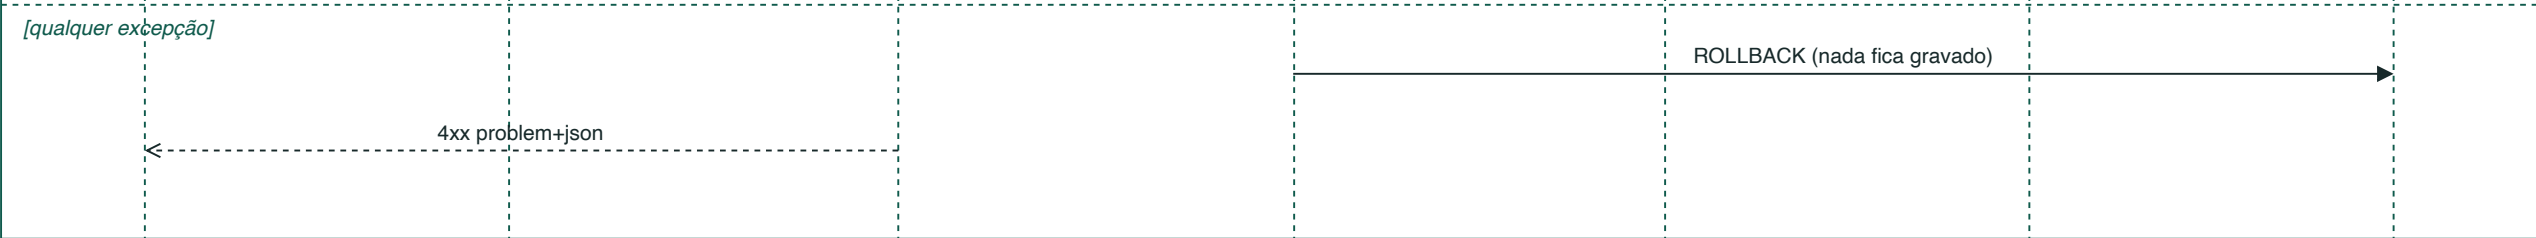

Login com JWT e limite de tentativas (Redis)

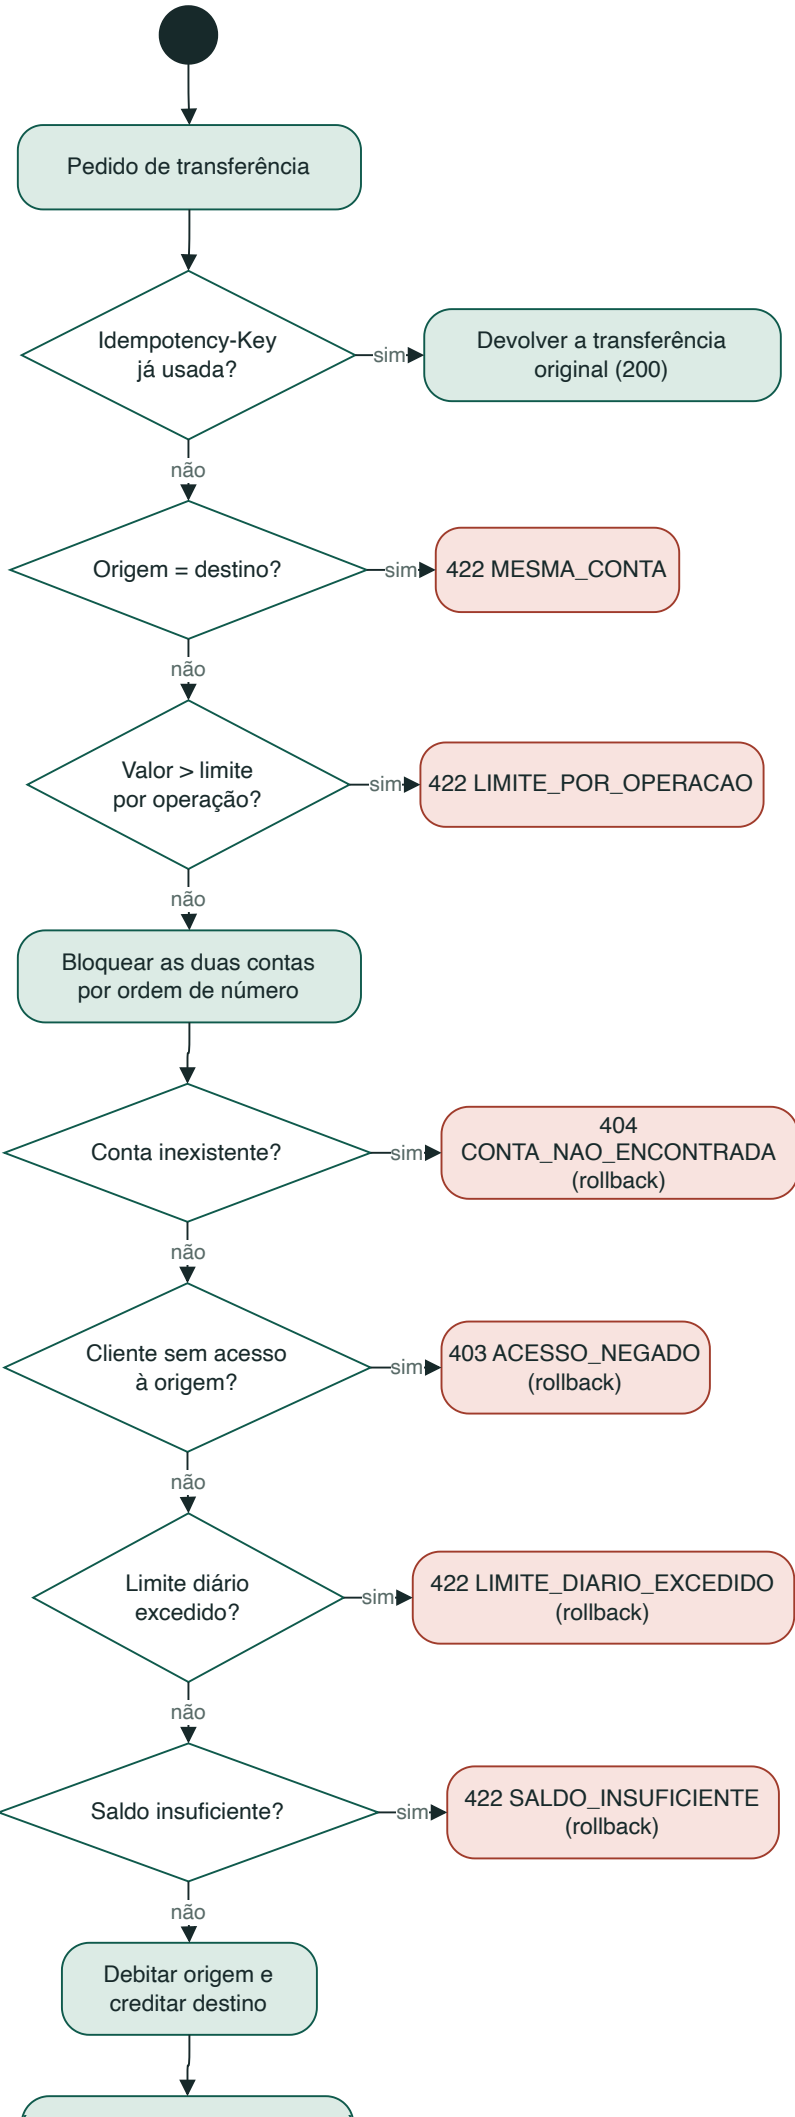

Transferência atômica (um único @Transactional)

Utilizador

Regras de uma transferência

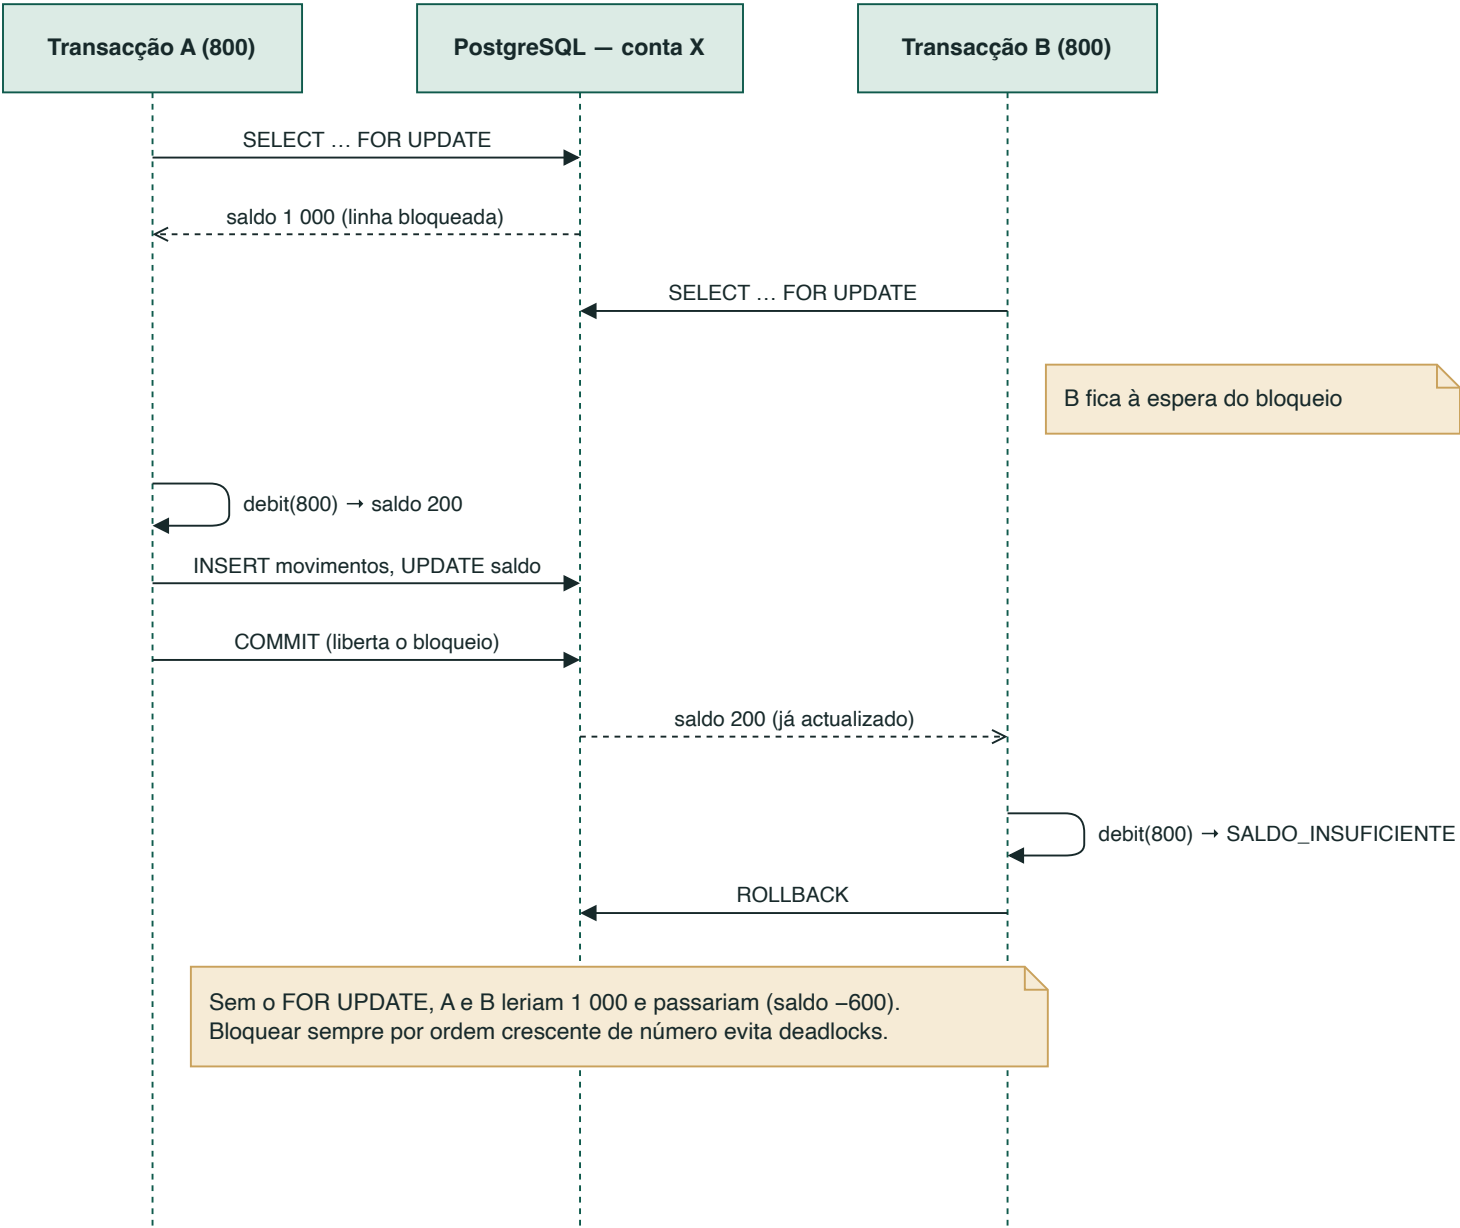

Registrar transferência
e dois movimentos

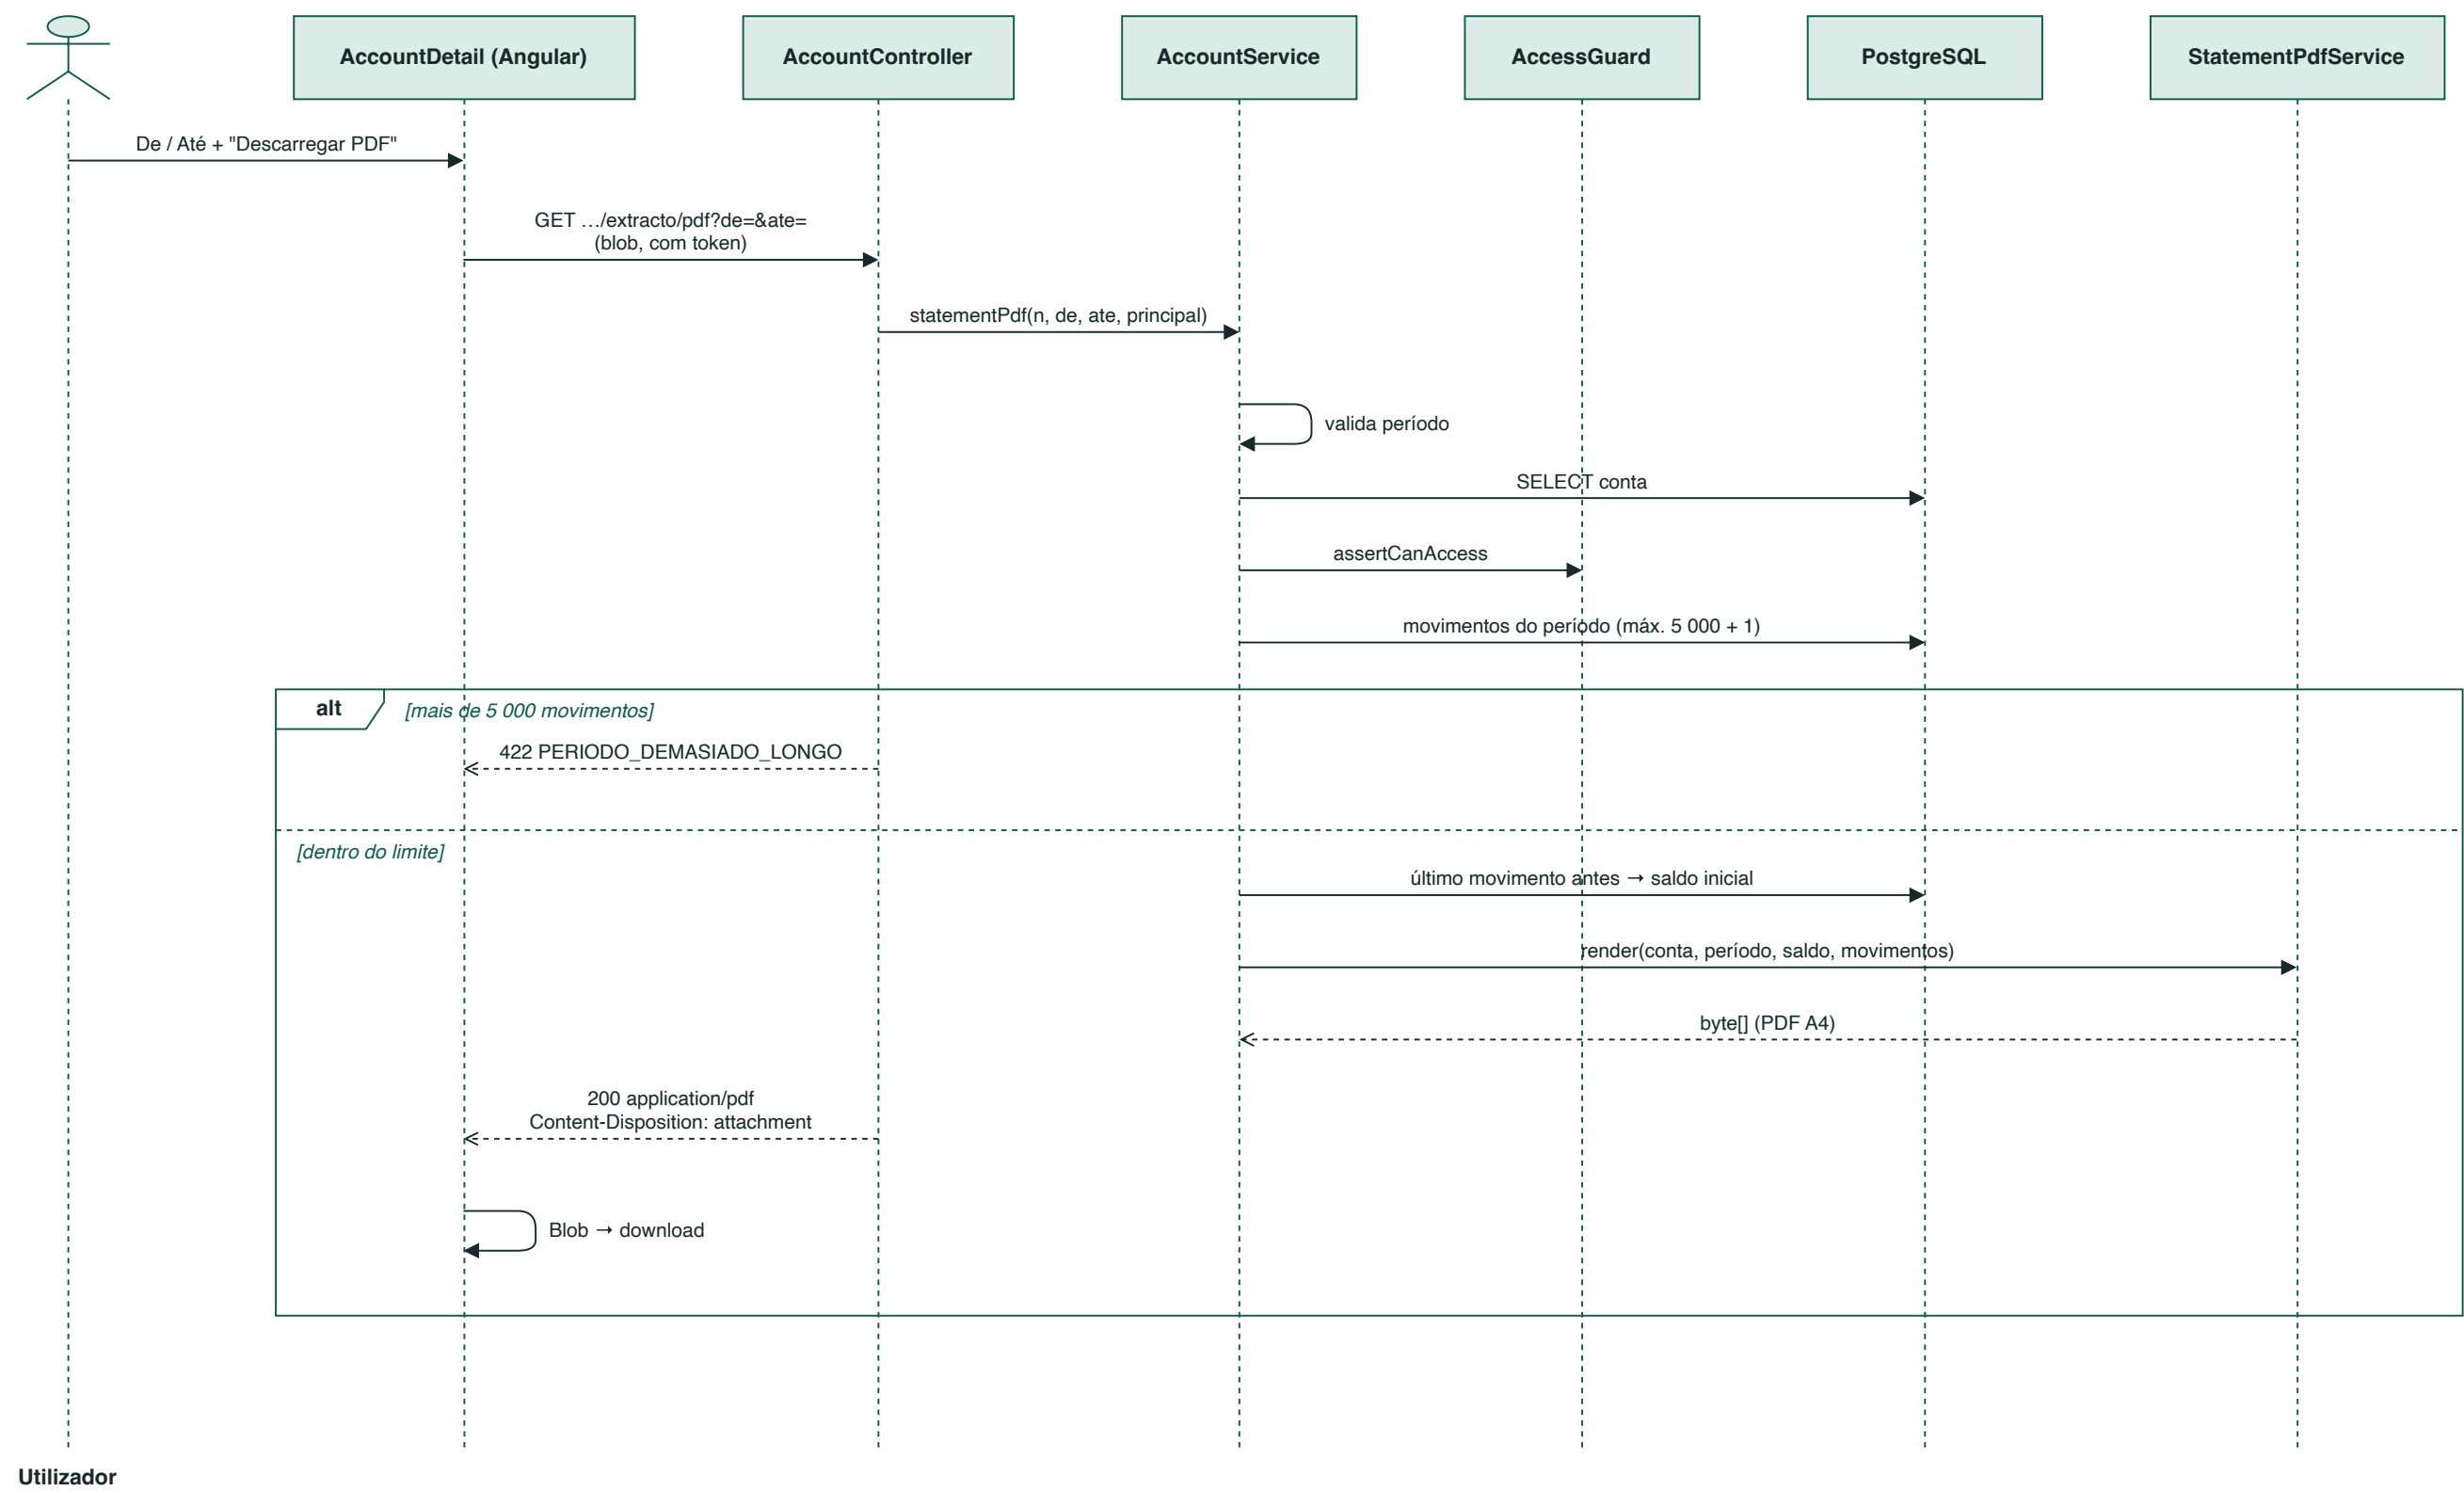

COMMIT e 201
com a referência

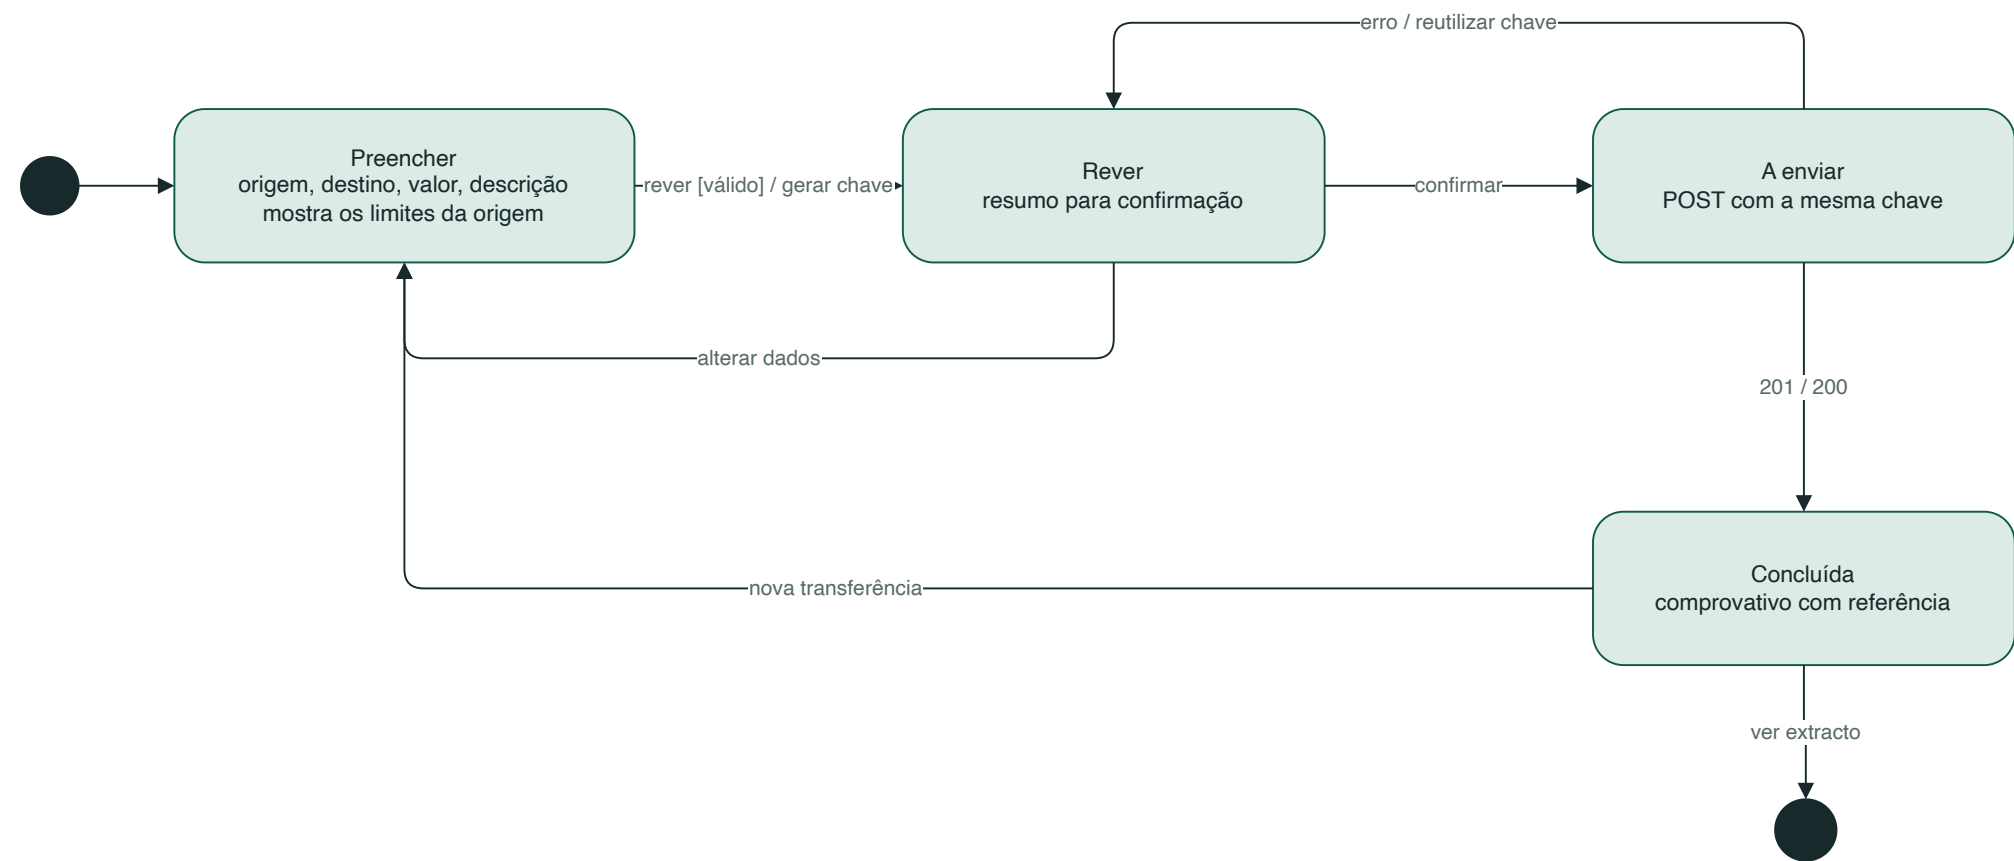

Concorrência: duas transferências de 800 sobre a mesma conta (saldo 1 000)

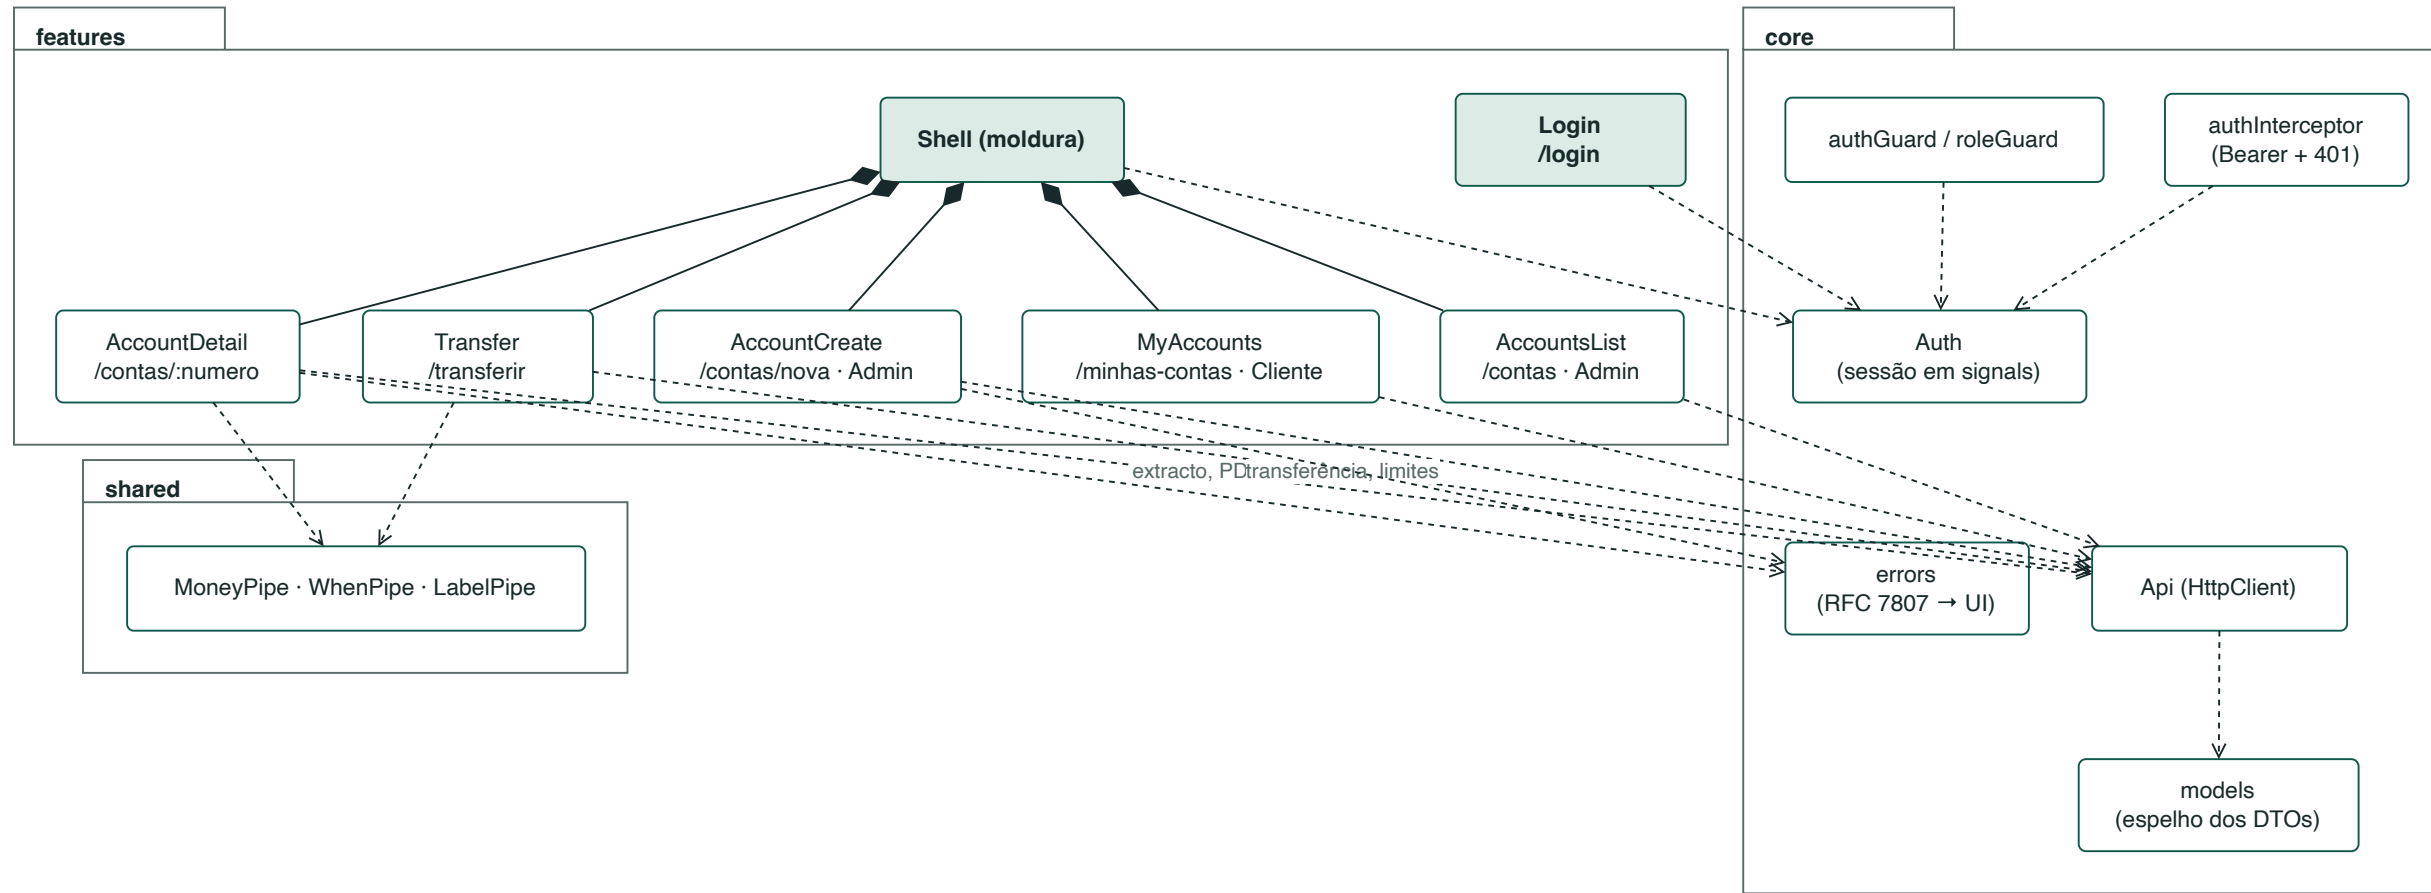

Extracto em PDF com filtro de datas

Ecrã de transferência: estados

Frontend Angular: estrutura e rotas

Migrações Flyway no arranque da aplicação
